

## LEVEL 150+ GENERAL BOATING

---

This manual inflatable lifejacket has a high buoyancy and is suitable for general boating. It does not have auto-inflate capability. However manual inflation is an option for activities such as sailing yachts offshore where a person can be exposed to spray and waves which may otherwise set off an automatic inflatable lifejacket. It also features a clear see-through window to enable checking the status of the auto cartridge and gas cylinder.

### SUITABILITY

---

-  **ACTIVITIES:** General boating. Not recommended for jet ski riding.
